Zoology 2
3rd/4th Grade

Assignment Sheet Week 1
August 20, 2020
Due August 27, 2020

- Read pages 1-7 in your textbook, stop at "**Try This!"**. We completed the simulated gyres experiment in the classroom. Please tell your parent about our experiment. Read the Nike story from the last part of "**Try This!"** on page 8 (first paragraph on page 8).

- In the Notebooking Journal on page 12, write four fascinating facts about aquatic animals that you learned about from the reading. Draw pictures that go along with your facts.

- On page 16 of the Notebooking Journal answer questions 1-6 and 12 (skip 7-11).

- Parents have your child act out the following forms of aquatic mobility. Mix up the actions and have them identify if it is nekton, benthos or sessile. Swim (nekton), scurry, crawl, hop, scoot, slither, or burrow (benthos) and stick themselves to one place and just sit there (sessile).

- OPTIONAL: Watch a video clip about "Benthos".

  *Parents, please use your discretion when deciding how much your child can read independently. I recommend reading together, since some of the vocabulary is challenging and the concepts would be enjoyable to learn together.

I have checked all of my child's work and he/she has all of the assignments completed for this week.
